Tech / Logistics sector
Sole HR generalist

Talent Acquisition Lead — 60-Person Australian SME

COMPANY SIZE

~60 employees

**APPLICATIONS /
ROLE**

200+

**SUPPORT
FUNCTION**

None dedicated

TOOLS USED

Seek, LinkedIn,
ATS

GOAL

Fill roles fast with people who can actually do the job — including emerging, hard-to-define roles (AI-adjacent, data-adjacent) her company is only just starting to hire for.

FRUSTRATIONS

- 01 Volume without clarity.** 200+ applications per role, many with overseas or unfamiliar job titles she can't quickly evaluate.
- 02 Cross-industry guesswork.** Candidates increasingly come from adjacent industries, and she has no reliable way to tell which skills genuinely transfer versus just sound similar.
- 03 Niche skills, no convention.** For newer areas like AI tools, even she isn't sure what "equivalent experience" looks like — so she defaults to rejecting what she can't map, knowing it costs her good candidates.

Signature problem: The Bridge

Which candidates actually map to her open role?

CANDIDATE BACKGROUND

Supply Chain Analyst

HER OPEN ROLE

Customer Insights Analyst

Shared competency: pattern-detection in operational data

CANDIDATE BACKGROUND

Finance Operations
Associate

HER OPEN ROLE

AI-Adjacent Business
Analyst

Shared competency: structured, data-informed decision-making

CANDIDATE BACKGROUND

Retail Operations
Manager

HER OPEN ROLE

Product Operations Lead

Shared competency: process orchestration across teams

"I'm not against hiring outside my usual pool — I just don't know how to tell what actually transfers when the skill itself is brand new."

HOW SKILL BRIDGE HELPS

US-2 Cross-Industry Translator

US-4 JD-Frequency Ranking

US-6 Skill-Level Matching Rate

Sarah sees each candidate's already-translated skill profile mapped to her specific role in plain language — so she can confidently shortlist unfamiliar or cross-industry candidates in minutes, without needing to already be an expert in their background herself.
