

Product Owner

Harbour Digital Products | Melbourne, VIC | Full-time

SYNTHETIC DEMO JOB DESCRIPTION - NOT A REAL VACANCY

About the role

Harbour Digital Products is seeking a practical Product Owner to keep information, people and operational priorities moving. This synthetic role is designed for the Skill Bridge upload and skill-mapping demo.

Key responsibilities

- Own and continuously prioritise the product backlog against customer and business outcomes.
- Lead discovery workshops, clarify requirements and translate evidence into roadmap decisions.
- Partner with engineering, design and business stakeholders throughout iterative delivery.
- Use product and operational data to evaluate outcomes and communicate trade-offs.

Skills and experience

- Product backlog management and prioritisation are essential.
- You must demonstrate product discovery, user research and requirements management.
- Stakeholder management and agile delivery are required.
- SQL, data analysis and dashboard development experience are preferred.

How success will be assessed

- Reliable follow-through on actions and deadlines.
- Clear, evidence-based communication of progress and issues.
- Accurate records and practical improvements to team workflows.

Inclusive hiring note

We value transferable capability and welcome candidates whose relevant skills were gained in another country or industry. A recruiter reviews every application; this demo does not automate hiring decisions.
