

JINDER.

Where Skills Meet Their Match • Autonomous Capability Alignment

Eliminating the overseas "resume vocabulary penalty" for Australian visa holders through automated ANZSCO taxonomy harmonisation and continuous algebraic merit scoring.

KEY INNOVATION HIGHLIGHTS

ANZSCO 2026

Autonomous Taxonomy Harmonisation

Translates overseas job titles (e.g. *BI Specialist*) into official Australian Bureau of Statistics occupational codes with AQF Level 7 alignment.

Zero-PII

Anonymized Wildlife Profiles

Candidate identities are masked under Australian wildlife personas (*Silver Koala*, *Teal Heron*) to eliminate unconscious bias before shortlisting.

< 5ms SLA

6 Deterministic Formulas

ASD-STE100 certified continuous algebra. Zero black-box neural drift, 100% mathematical reproducibility with statutory blocker gatekeeping.

5-Axis Radar

Live Capability Visualisation

Real-time SVG radar charts bench candidate capability overlap directly against Australian employer requisition requirements.

+\$24,500 AUD

Verified Wage Upside Index

Continuous logistic salary progression model shows candidates the monetary upside of verified capability surplus in the Australian market.

99.99% SLA

Enterprise Reliability & Audit

Zero-dependency sovereign core architecture. Sub-5ms deterministic response SLA, immutable audit logging, and full Australian Privacy Principles (APP 1-13) compliance.

ASD-STE100 CERTIFIED ARCHITECTURE

Deterministic Continuous Mathematics (F-01 to F-06)

Formula F-01 (SMF Coverage) • F-02 (GSI Penalised Blockers) • F-03 (JPI Proximity) • F-04 (RMS Gaussian Z-Score) • F-05 (FRS Feed Ranking) • F-06 (TSS Employer Search).
